

Trainer guidance: Promote data reuse for sustainable development

Learning materials provided by the Guide on Open Government Data (OGD) Action Planning for Sustainable Development can be used for sensitization and training of government officials and other OGD actors. This document aims to provide guidance to trainers who will use the learning materials on *Promote data reuse for sustainable development* as a training module on this topic.

Module Overview		Notes
Type	Lecture/presentation	Followed by Q&A moderated by facilitator
Time	20 min presentation plus Q&A	○ Total 30 minutes
Target Participants	All groups A to F (see below)	Max 60 participants, tables of 5 to 10
Prerequisites	Non	
Materials	Non	
Presentation	Slides English	Promote data reuse for sustainable development
Further reading	OGDCE Guidelines	Section IV - Sustaining the open data Ecosystem. Chapter: Promoting usages of Open Government Data

Learning objective

By completing this training module, participants will learn about:

- Valuable and useful data
- OGD supply and demand balance
- Making data valuable and useful
- Stakeholders reusing OGD
- OGD reuse options
- Approaches of OGD reuse for sustainable development

Guiding Questions

By completing this module participants will be able to answer the following guiding questions:

- How to publish valuable and useful OGD?
- Who are the different stakeholders reusing OGD?
- What are the priorities of these stakeholders?
- What are the different options for reusing OGD?
- What are some examples of reusing OGD for sustainable development?

Expected outputs

Participants will be able to explain and provide examples on:

- How OGD can be reused by different stakeholders

- The different aims of OGD reuse by these stakeholders
- Different options for reusing OGD
- Different approaches of OGD reuse for sustainable development

Methodology

This module will be conducted by an expert on OGD for Sustainable Development. The expert will introduce the module and provide an overview on learning objectives, materials to use, expected outcomes. The expert will then deliver a 20-minute presentation on the subject. The presentation will be followed by a Q&A session moderated by a dedicated facilitator.

Target Participants

- Government leaders (top-level, policy/decision makers)
- Government specialists and technicians (mid-level, ICT department, statistical officers)
- Civil Society Organizations (CSO) representatives
- Independent journalists and representatives from media organizations
- Academia (public administration, informatics, statistics)
- Private Sector (ICT companies and startups)
