- Monitoring on the feedback completeness and quality with respect to e-participation in Russia
- Rankings of transparency of federal and regional authorities
- Russian youth and public participation
- Survey on Open Government in Russia
Open Government Rankings

• **2012** Institute of the Information Society initiated the pioneering *Index of Russian Regions Governments Openness*, which was a meter of using open government tools by executive authorities in 82 regions (subjects of the Russian Federation)

• **2013** RIA Rating, a rating agency, and PRIME, an agency for economic information, in cooperation with RBC Group and under the auspices of the Advisory Council at the Government of the Russian Federation conducted a study, which made a basis for the *Openness Ranking of the Federal Bodies of Executive Power*
Open Government and Citizens Engagement Index

OG&CE Index =

\[ \frac{1}{4} \times \text{Social Networks Services} + \frac{1}{4} \times \text{Open Government Data} + \frac{1}{4} \times \text{Online Collaboration} + \frac{1}{4} \times \text{EGDI Connected Services} \]

Russian Federal Agencies
Open Government Index

The evaluation criteria used by RIA Rating, PRIME and RBC Group:

1) completeness, efficiency and quality of information related to the subject area of the respective federal executive body

2) accountability of the federal executive body

3) openness, accessibility and quality of the official web-site of the federal executive body

4) the possibility of civil participation in the activities of the federal executive body and of public presentation of the feedback from citizens, experts, NGOs, media

5) openness and approachability of the federal executive body through the prism of the media

Policy Measures and Methodological Framework

- On **21 May 2012** a new position was introduced into Russian Government: Minister for Open Government **Mikhail Abyzov**
- In 2013, Russia joined the top ten countries on the **Open Budget Index** of the International Budget Partnership
- Concept of Openness of the Federal Bodies of Executive Power (Draft)
- Standard of the Federal Executive Power Openness (Draft)
- Methodology of Monitoring and Assessment of Openness of the Federal Bodies of Executive Power (Draft)
  - indicators of development of openness mechanisms;
  - indicators of effectiveness of openness mechanisms introduction;
  - indicators of importance (utility) of openness mechanisms use;
  - indicators of efficiency of openness mechanisms use.
Pilot Projects

- **Russian Civil Initiative.** Dimension: E-Participation. Internet resource for placing citizens’ proposals on the socio-economic development, improvement of state and municipal government. Implemented on the federal level (http://www.roi.ru/).

- **Domouprava.** Dimension: Open Data. Improving the quality and accessibility of public housing and communal services. Implemented in the Tula region and in Moscow (http://dom.mos.ru).

25 July 2013

Tatiana Ershova, Yuri Hohlov, Sergei Shaposhnik
Conclusions and Recommendations

- Russian government has little accountability to its citizens and citizens’ attitude towards participation in public decision-making.
- The main reasons are traditional citizens’ mistrust in government and paternalistic model of social organization in Russia.
- Emerging e-participation activities have a potential to become “Potemkin e-villages” used to communicate to the international community democratic image, openness of government and modernization of Russia.
- Introduction of a special ministerial position in the Government of the Russian Federation and the formation of the methodological framework for citizens engagement at the federal and regional levels can be considered to be necessary and timely measures and should be strengthened by consistent efforts of all stakeholders.
